The Mission

Is it a bird, is it a plane?
No, it's The Mellow Brothers !

They came from outer space down to earth, on a mission to save electronic dance music from superficiality and boredom.

During the dull time of Covid Lockdown, The Mellowbrothers started their musical good-vibes firework in the winter of 2020.

The canadian-silesian power duo Shaw & Tulpe were inspired by a documentary about

legendary record producer Conny Plank and his free production techniques.

They wanted to create funky, powerful, organic-sounding music, full of love, sunshine & good spirit.

The idea was born to spread hope & positivity in a rather dark and gloomy epidemic situation.

(The line) 'Anything is possible and everything is allowed !' from The Mellowbros.? manifesto, is surely able to tear down the walls & boundaries that the sound and style etiquettes have built around electronic dance music in the recent years.

What came out of this lockdown winter is a trailblazing, unique melange, that blends the character of Soul, Funk, Rock, Reggae, Hip-hop and more, into a signature sound with a whole new edm livery.

They promised to never copy themselves and that is why every song is different, every song is fresh.

Trust me, when I say, The Mellow Brothers's debut album is gonna be legendary !
