WHO IS SANNER?

BIO
In 2024, Sanner has been on fire! We've hit the studio multiple times, rocked out at countless gigs, and smashed it at several band contests. Our latest tracks are pushing our style to new heights, and with our amazing fans, the SANNER-MATES, we've been tearing up every stage we hit.

Sanner's journey started back in 2017 when a group of school friends decided to form a band out of their love for music. We began with cover songs but quickly realized we wanted to create something unique. Fast forward to 2020, and we dropped our first EP, 'Nothing Remains,' which got rave reviews from fans and critics alike. Things really took off when Lars Ulrich from Metallica gave us a shoutout on Instagram - talk about a rocket launch!

Our live performances have earned us a rep as one of the most exciting and dynamic emerging acts around. In 2022, we took things to the next level by inventing a new genre we call:

'NEW SKOOL METAL'

SANNER
